

# APA Style References (7th Edition)

## Artificial Intelligence and ChatBots

**Author(s)**

**Date**

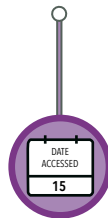

**Query**

OpenAI. (2023, February 2). [ChatGPT's response to a prompt about First Nations

in Ontario]. Accessed 2023, February 2. <https://chatgpt.pro/>.

0.5 in

**Date  
accessed**

**URL**

**Formatting:** Double-space your reference list and use a 0.5 inch hanging indent for each entry.

**Author(s):** Use the parent company name rather than the program.

**Date created/updated:** In round parentheses, write the year, followed by a comma, month, and day the page was created/updated, followed by a period. If there is no date listed, indicate 'no date' using (n.d.).

**Query:** Include a description in square brackets that includes information on what prompts were used when searching in the AI. End with a period.

**Date Accessed (optional):** Write 'Accessed' and the full date you accessed the resource, followed by a period. The format of the date is not important (e.g., Year, Month Day versus Month Day, Year), but ensure you are consistent with the date style for each citation to avoid confusion.

**URL/Site Name:** Write the URL of the page you are referencing, followed by a period. If the page was authored by a group or organization and the site name is the same, you can skip this.

**Note:** Some assignments do not permit the use of ChatGPT or AI tools. **Please confirm with your course lecturer if a ChatBot tool is permitted.** If using a ChatBot, **you must cite** the content used to avoid Academic Misconduct.
